

INTEGRATION NOTE

Apple TV - Crestron Home Driver

Manufacturer:	Apple
Model(s):	Apple TV HD, Apple TV 4K
Device Type:	Video Server
Control Platform:	Crestron Home (4-Series processors, e.g. CP4-R)
Tested Crestron Home Version:	4.010.0016
Connection:	Ethernet (IP), discovered Companion TCP port
Driver Developer:	Home Ergonomic Programming
Document Revision Date:	21 July 2026

OVERVIEW

This driver allows a Crestron Home system to control Apple TV HD and Apple TV 4K devices over the local network, providing navigation, playback and power control.

The driver uses Apple's encrypted local Companion protocol. Pairing is completed on a Windows computer with the supplied Setup Utility before the IP address, discovered Companion port and credential are entered in Crestron Home.

SUPPORTED FEATURES

Navigation, playback and setup support:

- Wake and sleep commands
- Cursor Up, Down, Left and Right
- Select and Back
- TV / Home and Control Centre
- Native Play / Pause toggle plus discrete Play and Pause commands
- Next and Previous
- Fast Forward and Rewind
- Skip forward or backward by 10 seconds where the active app supports it
- Screensaver activation
- Encrypted Companion Pair-Verify sessions
- Automatic reconnect with bounded retry backoff

Control is one-way: the driver does not report playback metadata, application, volume or power status. Application launching and account switching are not supported.

ANY FEATURE NOT SPECIFICALLY NOTED AS SUPPORTED SHOULD BE ASSUMED TO BE UNSUPPORTED.

DRIVER LICENCE

This driver requires a licence key to function after the one-hour evaluation period. Licences are issued on a per-controller basis: one licence covers all Apple TV driver instances on the same Crestron Home processor.

Licences can be purchased securely through [the Apple TV checkout page](#). Polar is the merchant of record and emails the licence key when purchase completes.

Enter the licence key when adding the driver (or later via the device's Installer Settings). The driver activates it automatically over the internet and binds it to that processor, which requires internet access for activation and periodic validation.

DEVICE SETUP

Give the Apple TV a fixed IP address before pairing. Configure a static address on the network or create a DHCP reservation in the router; the driver will stop working if the Apple TV address changes.

Download Apple TV.zip and extract the complete archive on a Windows computer connected to the same local network. Open the Setup Utility folder and run AppleTVCompanionSetupUtility.exe. Keep the supplied runtime folder beside the executable; Python and Visual Studio are not required.

In the utility, scan for devices, select the required Apple TV and start pairing. Enter the PIN displayed by the Apple TV when prompted. The pairing appears on the Apple TV as 'Crestron Home'. Record the reported IP address, Companion port and Companion credential.

Treat the credential as sensitive because it contains a long-term private key. Do not place it in logs, screenshots or support bundles. The Companion port is discovered dynamically and may not be 49152, so always use the exact value reported by the utility.

INSTALLATION PROCESS

1. Copy the Apple TV driver package (.pkg) to the Crestron Home processor by SFTP using Crestron Toolbox or FileZilla. Place it in the following directory:

`/user/ThirdPartyDrivers/Import`

2. Crestron Home imports the driver automatically. This can take a few minutes; the package disappears from the Import directory when processed.

3. In the Crestron Home Setup app, add the driver to the appropriate room under Drivers -> Video Server -> Apple. Enter a descriptive name, the fixed Apple TV IP address and the exact Companion port reported by the Setup Utility.

4. In Installer Settings, enter the Polar licence key and paste the complete Companion credential reported by the Setup Utility. Do not enable separate username/password authentication.

5. Assign the Apple TV HDMI output to a display on the Source Routes page so it appears as a selectable source, then test navigation, Play / Pause, sleep and wake.

COMMON MISTAKES

1. The Apple TV uses a changing DHCP address. Configure a static address or bind it with a router DHCP reservation, then update the driver to match.
2. The default port 49152 was assumed instead of using the Companion port reported by the Setup Utility. Re-scan and enter the discovered port.
3. The Setup Utility was run from inside the ZIP or without its runtime folder. Extract the complete Setup Utility folder before launching the executable.
4. The stored pairing was removed or the credential was copied incompletely. Remove the old Apple TV pairing if necessary, pair again and replace the entire credential.
5. Licensing errors are usually caused by the processor lacking internet access. Check working DNS and confirm that outbound HTTPS (TCP port 443) to api.polar.sh is not blocked.

SUPPORT

For driver or installation issues not addressed here, contact support@home-ergonomic-programming.co.uk and include as much detail as possible, including a recent processor error log. Never include the Apple TV Companion credential.

DISCLAIMER

This driver is developed and supplied by Home Ergonomic Programming. It is an independent product: Home Ergonomic Programming is not affiliated with, endorsed by or connected to Apple Inc.

Apple, Apple TV and tvOS are trademarks of Apple Inc., registered in the United States and other countries and regions.

By purchasing a licence for, installing or using this driver you agree to the Terms and Conditions set out at the end of this document. The driver is provided without warranty of any kind; always test it in the target system before live use.

TERMS AND CONDITIONS

These Terms and Conditions ("Terms") apply to the sale of licences for, and the supply and use of, the Apple TV Crestron Home driver. Please read them carefully before purchasing a licence or installing the software. If you do not agree to these Terms, do not purchase, install or use the software.

1. About us

- 1.1 The software is developed and supplied by Home Ergonomic Programming ("we", "us", "our").
- 1.2 You can contact us by email at support@home-ergonomic-programming.co.uk.

2. The software

2.1 These Terms apply to the Apple TV Crestron Home driver, together with any updates or new versions we may supply (the "Software").

2.2 The Software is licensed to you, not sold. All intellectual property rights in the Software remain our property at all times, including after installation on your equipment.

3. Licence

3.1 The Software requires a licence key to function. Licences are issued on a per-controller basis: a single licence covers all instances of the Software on the same control processor. The licence key is activated over the internet and locked to the first control processor on which it is used.

3.2 Subject to payment of the applicable licence fee, we grant you a non-exclusive, non-transferable, limited, revocable licence to install and use the Software on the control processor specified at the time of purchase. The number of installations must not exceed the number of licences you have purchased.

3.3 A licence is valid only for the specific control processor identified at the time of purchase and may not be resold or transferred to any other system. In exceptional circumstances we may, at our sole discretion, authorise the transfer of a licence to a new system, and we reserve the right to charge an administrative fee for this service or to refuse authorisation.

3.4 You may not copy (except as reasonably necessary for installation and backup), distribute, sell, sub-license, rent or lease the Software to any third party without our prior written consent.

3.5 You may not decrypt, decompile, disassemble, reverse engineer, translate, modify or create derivative works of the Software, in whole or in part. Any breach of this clause will immediately terminate all licences held by you.

3.6 Licence activation and periodic licence validation require the control processor to have internet access. We are not liable for any interruption to the operation of the Software caused by network restrictions, firewall rules or DNS failures at the installation site that prevent communication with the licensing service.

4. Ordering and payment

4.1 The Software is designed to be installed and configured by qualified system integrators for the Crestron Home platform. We sell business-to-business only and do not licence the Software to end consumers. By purchasing a licence you confirm your status as a qualified system integrator. If you are the owner of a system and believe you require the Software, please contact your system integrator, who can obtain a licence and carry out the integration work on your behalf.

4.2 Licences can be purchased from

https://buy.polar.sh/polar_cl_ppJOWtEjy1C8fLGoSlZwFimAlGaAW0vmO3ASK2INNxx. All purchases are processed by Polar (polar.sh), acting as merchant of record. Polar handles payment processing, applicable tax calculation and receipts. We do not see, handle or store payment card details.

4.3 Prices are as displayed at checkout and are exclusive of any applicable taxes, which are calculated and added at checkout by the merchant of record. We reserve the right to amend prices, or to withdraw the Software from sale, at any time.

4.4 Please ensure the details you provide when ordering are complete and correct; we cannot be held responsible for any delays or losses caused by incorrect information being supplied. A contract between you and us for the licence of the Software exists once you have received your licence key.

5. Delivery

5.1 The Software is supplied by download only; it is not available in any physical format and there are no delivery charges. Licence keys are delivered automatically by email by the merchant of record on completion of purchase, to the address given at the time of ordering. Please check your spam folder before contacting us regarding a missing licence key.

6. Refunds

6.1 We do not generally offer refunds on licensing. If you have made a mistake during your purchase, or have another legitimate reason for requiring a refund, please contact us as soon as possible using the details in clause 1.2. A refund may be offered within 7 working days of purchase in some circumstances, but no refund will be considered once the Software

has been installed on the relevant control processor. Refunds are processed by the merchant of record and may additionally be subject to its terms.

7. Third-party devices and services

7.1 The Software controls equipment and services provided by third parties. Apple, Apple TV and tvOS are trademarks of Apple Inc. We are not affiliated with, endorsed by or connected to Apple Inc. in any way.

7.2 The operation of the Software depends on the behaviour of the Apple TV device, tvOS and associated services, which may be changed, updated or withdrawn by the manufacturer at any time without notice. We are not responsible for loss of functionality caused by such changes, although we will use reasonable endeavours to restore functionality where practicable.

7.3 We reserve the right to modify, suspend or withdraw the Software at any time and for any reason, including where the equipment or service it controls is discontinued or substantially modified.

8. Warranty disclaimer

8.1 The Software is provided “as is” and “as available”, without any warranty, condition or representation of any kind, whether express or implied, to the maximum extent permitted by law, including without limitation any implied warranties of satisfactory quality, fitness for a particular purpose and non-infringement.

8.2 We do not warrant that the Software will meet your requirements, that its operation will be uninterrupted, timely, secure or error-free, or that any defects will be corrected.

8.3 Whilst every care is taken in the development and testing of the Software, you must always carry out your own testing in the target system before first use. You are solely responsible for verifying the Software's suitability for your project.

9. Limitation of liability

9.1 Nothing in these Terms excludes or limits our liability for death or personal injury caused by our negligence, for fraud or fraudulent misrepresentation, or for any other liability that cannot be excluded or limited under English law.

9.2 Subject to clause 9.1, we shall not be liable, whether in contract, tort (including negligence) or otherwise, for any indirect or consequential loss, loss of profit, loss of business, loss of data, or damage to computer systems or control platforms, arising out of or in connection with the installation or use of the Software.

9.3 Subject to clause 9.1, our total aggregate liability arising out of or in connection with the Software shall not exceed the amount paid by you for the licence to the Software or £100, whichever is the greater.

9.4 You install and use the Software at your own discretion and risk.

10. Support and updates

10.1 Support for the Software is provided on a reasonable-endeavours basis via the contact details in clause 1.2. When requesting support, please include as much detail as possible, including a recent processor error log.

10.2 The Software is supported for as long as it is offered for sale. We reserve the right to withdraw the Software from sale and discontinue on-going support at any time and for any reason; the remainder of your rights and obligations under these Terms will not be affected.

10.3 We may release updates to the Software from time to time, but we are under no obligation to do so.

11. Termination

11.1 The licence granted under these Terms terminates automatically if you breach any of them. On termination you must remove the Software from all control processors and destroy all copies in your possession.

12. General

12.1 These Terms constitute the entire agreement between you and us in relation to the Software.

12.2 Each of the paragraphs of these Terms operates separately. If any court or relevant authority decides that any of them is unlawful or unenforceable, the remaining paragraphs will remain in full force and effect.

12.3 This agreement is between you and us. No other person shall have any right to enforce any of these Terms.

12.4 These Terms are governed by the laws of England and Wales, and the courts of England and Wales shall have exclusive jurisdiction over any dispute arising from them.
